

WORKSHOP

GEORGES GARDARIN

in recognition to his research and teaching contributions in the database field

CO-LOCATED WITH VLDB'09 LYON, AUGUST 24th, 2009, 14H - 18H

<http://wgg.prism.uvsq.fr>

Registration is free of charge

Welcome

Georges Gardarin has been a pioneer of database research in France, starting in the early 1970 at University Paris 6 and INRIA, and quickly gaining international stature. During his entire career, Georges has had major contributions to research, industry and teaching in data management. In particular, he supervised more than 50 PhD students who in turn (and recursively) trained more students, for a total genealogy of about 150 PhD students. He has also got famous among students for his wine-drinker database example (which he never patented). As an educator, he wrote many books and his personal web site (with thousands of slides on all topics of data management) is a reference for all database teachers in France.

In 1981, Georges was the general chair of VLDB which he organized in Cannes, on the French Riviera. 28 years later, VLDB returns to France with many of his ex-PhD students (including the general chair) participating in the VLDB committees. So we thought this was the perfect occasion to honor Georges by organizing a workshop which would feature his ex-PhD students and close colleagues, coming to share their experience and lessons learned during their career. This is also a good occasion to gather people who are somehow related through Georges and discuss past, present and future database research.

We are grateful for the generous support of our sponsors (PRISM, INRIA and ECL Lyon) to make this event free of charge. We also thank the VLDB Organizers who made this event possible.

As a final word, thanks Georges, for all you did for us.

Welcome to this special event.

Welcome and enjoy VLDB 2009, Lyon and France.

*Mokrane Bouzeghoub, Philippe Pucheral, Eric Simon and Patrick Valduriez
On behalf of Georges Gardarin's PhDs social network*

Short Bio of Prof. Georges Gardarin

Georges Gardarin was born in Riom, France, on February 19, 1947. He enters Ecole Normale Supérieure de l'Enseignement Technique in 1968. From 1971 to 1978, he was assistant professor at Paris VI University. During that period, he was also consultant at Ordoprocessor where he built a computer system, and at Renault where he designed a new distributed information system. He did his PhD Thesis in 1978 on Concurrency Control in Distributed Databases at University of Paris VI. From 1978 to 1980, he was visiting professor at UCLA, California. He published several papers on concurrency control and database integrity, notably with Profs. W. Chu and M. Melkanoff.

From 1980 to 1990, he was professor at Paris VI University, teaching databases and distributed systems. He was also chief-scientist at INRIA where he headed the Sabre project, which was developing an object-relational parallel DBMS. From 1990 to 2000, he created and developed the PRISM Research Laboratory, associated to the CNRS and to the new University of Versailles Saint-Quentin.

On the industrial side, Georges created two companies. The Infosys startup, founded with his PhD students in mid of 80', has been created to industrialize two research products: a relational database system (Sabrina) and a database CASE tool (Secsi). After 7 years activity, the Company has been sold to EDS. In January 2000, he created XMLMedia, a start-up he founded with industrial partners. The start-up was developing XML middleware to store and publish XML on top of classical DBMSs. The resulting products are currently distributed by several licensed companies, one version being distributed in open source by Odonata.

From January 2003, he is back Professor at the University of Versailles. He is leading a team developing projects on data integration and mining. An extended mediator with intelligent wrappers based-on text mining has notably been developed.

Georges has written more than 120 papers in international journal and conferences, and several books in French, some of them being translated in English and Spanish. He wrote the most known French database book and has more recently published a book on XML and information systems. Georges has chaired many conferences as general chair or program chair or honorary chair, including VLDB (1981, 1986, 1991), EDBT (1996, 2008), SIGMOD (1986). He has been a member of VLDB foundation during 12 years.

WORKSHOP

GEORGES GARDARIN

in recognition to his research and teaching contributions in the database field

CO-LOCATED WITH VLDB'09 LYON, AUGUST 24th, 2009, 14H - 18H

Welcome

Program

Venue

Photos

Dazibao

Program

Parallel Join Processing: From Relational to Social Networks, a Historical, Biased Perspective
Patrick Valduriez, INRIA Montpellier

Delivering Affordable Large Scale Data-Storage
Philippe Bernadat, HP France

Schema Matching and Integration in Large Scale
Zohra Bellahsene, University of Montpellier

Data Quality: a Continuous Issue for Data Integration Systems
Mokrane Bouzeghoub, University of Versailles SQY

Old Database Problems Revisited by BI Applications
Eric Simon, SAP/BusinessObjects

Databases on Chip: Challenges and Applications
Philippe Pucheral, INRIA Rocquencourt

From Alphanumeric Databases to Multimedia Databases: Challenges and Perspectives
Liming Chen, ECL Lyon

Geolocation, mobility and databases
Karine Zeitouni, University of Versailles SQY

XML Query Processing on Distributed Hash Tables
Ioana Manolescu, INRIA Saclay

The Other INRIA Project-Team on Databases
Serge Abiteboul, INRIA Saclay & Michel Scholl, CNAM Paris

Competing with Georges: 30 Years of Fun
François Bancilhon, Rydeka

Georges' Words to Future PhD Students

WORKSHOP

GEORGES GARDARIN

in recognition to his research and teaching contributions in the database field

CO-LOCATED WITH VLDB'09 LYON, AUGUST 24th, 2009, 14H - 18H

Welcome

Venue and Registration

Location

The Workshop will take place in one of the rooms allocated to the VLDB Conference in the Congress Center of Lyon. Detailed information is given in the [VLDB Webpage](#) and in the [Congress Center Website](#).

Registration

Participation to Georges Gardarin Workshop is free of charge. However, to evaluate attendance and help for a better organization, participants must register to the workshop before August 15th 2009.

The [registration form](#) can be sent by email to: [Mokrane.Bouzeghoub](mailto:Mokrane.Bouzeghoub@prism.uvsq.fr) (at prism.uvsq.fr)

Social Event

The workshop will end by an open cocktail given in honor of Georges Gardarin.

The exact location of this event will be given later in this Webpage or during the workshop.

Note for those who cannot attend the workshop

If you were one of the Georges' student or colleague and you are sorry to not attend the workshop, you can send a warm message to Georges at this [address](#). All messages will be collected and put in this site. Similarly, old photos of the various Georges' Teams are welcome.
